

ALDEBARAN NAO

**Discover
new horizons
in Education and
Development!**

The future is NAO!

Today NAO wows users of all ages in areas such as academic learning, research, and development.

What do they do with NAO? Anything from learning to programming to developing applications to explore tomorrow's uses of robots.

How can they do this? It's easy, we've created software which is easily used by all skill levels and meets users needs.

TEACH

Choregraphe

Program behaviors with simple drag and drop boxes or through complex coding

Curriculum

Teach step-by-step lessons targeting secondary to high school

ASSIST

ASK NAO interface

Easily program and launch learning sessions in primary and special education classrooms

DEVELOP

SDK

Create modules in C++, Python, Java, MatLab, or .Net

Simulator

Test your applications in a 3D workspace

We at Aldebaran have chosen, since 2005, to drive technology into the future by designing and making humanoid robots for the well-being of humans. Our robots are different from many other robots in the world. They are cute, interactive, emotional, and constantly evolving. Tomorrow they will be your companion, living at home with you. Not like a pet and not like a human, but rather like an Aldebaran robot!
